# **ScriptPhD.com Consulting Services**

## **Film and Television**

The growing popularity of science and technology content in film and television has raised the bar for production of realistic science fiction genre entertainment. With our fingers on the pulse of the latest science and technology content in entertainment and media, ScriptPhD.com provides core creative solutions in the following areas:

### *Background Research:*

Interested in some technical research and/or insights before you've even begun writing your screenplay but don't know where to start? We diligently scour the current medical and science research literature to answer any questions, no matter how specific, to help you incorporate this material and make the science in your script sizzle and shine above the rest.

### *Set Design:*

Need to build a laboratory space on your set? Need advice on scientific instrumentation? Working in concert with scientists, engineers, leading laboratory construction architects and your set designers and coordinators, together, we will create a dynamic, accurate, attractive set that enhances your show or film and preserves scientific integrity.

### *General Consulting Inquiry:*

Before even starting a script, any good screenwriter, producer or director must get a strong overview of the characters and setting that will define the program or film. To help you do this, ScriptPhD.com offers additional options that include one-on-one or group discussions about background details (dialogue, dress, thought process, behavior) or answering any other questions via in-person or phone conference consulting session.

## **Screenplay Analysis and Development**

Converting a story concept to a script, then to a living, breathing film or television show is a daunting enough prospect—imagine having to incorporate difficult technical jargon or a complex scientific plot to the mix! Offering a wide range of consulting service packages, ScriptPhD.com can doctor your script to life.

*Silver Package:* Basic script coverage notes with a focus on science and technology incorporation, plus one one-hour meeting overview. (\$500)

*Gold Package:* Basic script coverage notes, three one-hour discussions, plus notes on rewrite. (\$1,500)

*Platinum Package:* Treatment/story development, script coverage notes on completed draft, three one-hour discussions, plus notes on rewrite. (\$2,500)
